

“Dear Customers,

In compliance with the orders issued by the Italian government in recent weeks (and, in particular, the Prime Minister's Decree of March 11, 2020), providing for urgent measures to contain the spread of the COVID-19 virus throughout the country, Cablotech S.r.l. has adopted all of the restrictive measures required for the health and safety of its own employees and those of its customers and suppliers.

*With the Prime Minister's Decree of March 22, 2020, further, new restrictive measures entered into force, including, in particular, the suspension of all commercial and industrial production activities, **with the exception of those deemed essential and expressly indicated in the attachment to the decree and their respective supply chains.***

***Cablotech's business falls within ATECO Code 33.20.02** (“installation of electric and electronic devices for telecommunications, radio/television transmission devices, electric and electronic equipment systems (excluding installation inside of buildings)”) and is, therefore, expressly included among the business activities that are allowed to continue (ATECO Code 33 macro-category).*

Cablotech intends to support its customers, providing operational continuity, in strict compliance with the government orders and with the March 14, 2020 "Shared protocol regulating the measures to contain the spread of the Covid-19 virus in the workplace" (as contemplated by article 1(3) of the Prime Minister's Decree of March 22, 2020).

However, the situation is complex and continues to evolve.

Cablotech is trying to plan its production for the coming weeks and, as you can imagine, production has already been drastically reduced in order to comply with the restrictive measures.

Despite Cablotech's best efforts, we cannot rule out or foresee the adoption of further restrictive measures or possible delays in production and relating deliveries, due, among other things, to possible decisions by Cablotech suppliers to suspend their activities.

Should that occur, in any case the delays would be of an exceptional and temporary nature, due to unforeseeable, unavoidable events of force majeure, in no way depending on Cablotech.

We will therefore provide you with updates concerning the delivery of orders in the process of being filled.

Trusting that you will understand, we thank you for your cooperation.

Kind regards

CABLOTECH S.R.L.
